(54) **Title:** WAGERING GAME PROVIDING FREE GAME PLAY AS A PROGRESSIVE AWARD

(57) **Abstract:** A wagering game is comprised of a basic game and a progressive award. The progressive award increases based on wager inputs received from players playing at one or more gaming terminals. The actual value of a progressive award is determined by follow-up game play by a player at the gaming terminal. The follow-up game play can include one or more free plays of the basic game. The follow-up game play can also include the opportunity to play a progressive game where a player selects options in the progressive game that are associated with a monetary award. The options are different for different progressive awards that are achieved, such that a higher progressive award yields a higher expected value, which is effected by more favorable player-selectable options in the progressive game.
